

# Seeded-Defect Log

Guna Kondapaneni, Lisa Campbell, Matthew Pace,  
Brian Kaetzel, Joseph Khawly

Severity: 1 - Least Disruptive to 5 - Most Disruptive

Defect No.	Defect	Output Before Seeding	Output After Seeding	Suggested Correction	Severity	Owner
1	Recurring events listed multiple times in stress form	You only have to rate a recurring event once, and it applies to all of them	You have to rate a recurring event <b>for every time it is on your calendar</b>	Use Lodash to remove duplicate event titles, and store recurring event rating together as one	4	GK
2	All day events not displayed in calendar	Events that last the entire day are displayed in the "all day" row.	No events show up in the "all day" row.	In BackendApplication.java , remove the if (event.getStart().getTime() != null) check in getEventsMultiCal(), gettingEventsSpecfic(), and gettingEvents()	4	JK
3	Stress form accepts values greater than 10	Stress form input turns red to indicate invalid input.	Stress form turns green to indicate the input is valid.	In StressFormPage.jsx, if(num > 10) { return 'error' }	3	LC
4	Stress form accepts decimal values	Stress form input turns red to indicate invalid input.	Stress form turns green to indicate the input is valid.	In StressFormPage.jsx, add a regex that checks to see if the input is an integer [0-9]*	2	LC

5	Calendar import allows User to submit without selecting Calendar	If User fails to select a calendar, then they get an error	If User fails to select a calendar, a default calendar is submitted	Make a Error SweetAlert that displays to in the ImportPage.jsx	3	GK
6	Ok button on loading dialog does nothing	'OK' is hidden on the Alert	'OK' button appears and doesn't work	Set the SweetAlert 'ok' button to "notVisible"	3	GK
7	Color for stress 10 events are green	Color coding on the calendar is as expected (see instructions)	Color coding on the calendar is inverted (green now appears for events rated 1-10)	Correct names for classes in events.less	2	MP
8	Tools drop-down appears on login page	No tool drop-down appears on login page	Tool drop-down appears on login page	Add auth check in Navigation.jsx, renderDropdown()	3	MP
9	Stress form accepts values less than -10	Stress form input turns red to indicate invalid input.	Stress form turns green to indicate the input is valid.	In StressFormPage.jsx, if(num < -10) { return 'error' }	3	LC
10	Redir for import page goes to stress form	Selecting 'Import Calendars' from Tools drop-down redirects the user to the Import Calendar Page.	Selecting 'Import Calendars' from Tools drop-down redirects the user to the Stress From Page.	In Navigation.jsx, <code>&lt;MenuItem onClick={() =&gt; setActiveView(StressFormPage)}&gt;</code> Import Calendar <code>&lt;/MenuItem&gt;</code> should be <code>&lt;MenuItem onClick={() =&gt; getCalendars()}&gt;</code> Import Calendar <code>&lt;/MenuItem&gt;</code>	3	BK
11	Color for stress -10 is red	Color coding on the calendar is as expected	Color coding on the calendar is inverted	Correct names for classes in events.less	2	MP

		(see instructions)	(green now appears for events rated 1-10)			
12	Redir for stress form goes to import page	Selecting 'Rate Events' from Tools drop-down redirects the user to the Stress Form Page.	Selecting 'Rate Events' from Tools drop-down redirects the user to the Import Calendar Page.	In Navigation.jsx, <code>&lt;MenuItem onClick={() =&gt; getCalendars()}&gt;  Rate Events  &lt;/MenuItem&gt;</code> should be <code>&lt;MenuItem onClick={() =&gt; setActiveView(StressFormPage)}&gt;  Rate Events  &lt;/MenuItem&gt;</code>	3	BK
13	Advice for each day is mixed up	Advice: Sun. - "Go for a walk. It is really nice outside" Mon. - "Be the best you, you can be" Tue. - "Don't let the week get you down. There is always the weekend!" Wed. - "Don't give up! You are almost there!!" Thu. - "Well, time to go to the Cactus" Fri. - "IT IS FRIDAY, OMG!" Sat. - "Treat yourself to something today. You have had a hard week."	Advice: Sun. - "IT IS FRIDAY, OMG!" Mon. - "Treat yourself to something today. You have had a hard week." Tue. - "Well, time to go to the Cactus" Wed. - "Go for a walk. It is really nice outside" Thu. - "Don't let the week get you down. There is always the weekend!" Fri. - "Be the best you, you can be" Sat. - "Don't give up! You are almost there!!"	In Data.java getSomeWisdom() function, adviceArray indexes should be 6, 2, 1, 5, 3, 0, 4.	2	BK
14	Logout in wrong position in tools	Tools drop-down order: Import Calendar	Tools drop-down order: Import Calendar	In Navigation.jsx, change MenuItem order	1	BK

	drop-down	Rate Events Advice Logout	Logout Rate Events Advice	in renderDropdown() function.		
15	Stress form allows letters	Stress form input turns red to indicate invalid input.	Stress form input turns green to indicate valid input.	Add a regex in StressFormPage.jsx that doesn't allow letters for the input.	5	LC
16	Page content is partially hidden by nav bar	Page content is fully visible under Navbar	Page content is partially hidden by nav bar	In bootstrap.less, adjust the padding for body	2	MP
17	Events are an hour off correct time	Events on the calendar in the app are identical to the times on their Google Calendar.	Events on the calendar in the app are an hour ahead for both the start and end times when compared to their Google Calendar. Ex. If they have a class in their Google Calendar from 9am-10am, in the app, it shows the event being from 10am-11am.	In UserPage.jsx, remove the following line: dat = moment(daty).set({ hour: parseInt((dat.getHours() + 1), 10))).toDate()	2	LC
18	Stress rating of 0 stays orange	Calendar events that have 0 stress rating are blue	Calendar events that have 0 stress rating are orange	Correct the class name for events with 0 stress rating in UserPage.jsx, eventPropGetter()	3	MP
19	Recurring events are un-rateable	Recurring events can be rated and added to the calendar	Recurring events <b>cannot</b> be rated and added to the calendar, but will appear on the	Check for '_', and make sure that is it special, and add to DB in a way that all recurring version	5	GK

			rating page	have the same rating		
20	No events from the user's Google Calendar are displayed on Thursday with the correct title	Events on the user's Google Calendar on Thursday show up on Thursday in the app.	Events on the user's Google Calendar on Thursday have a different Title. They say "Cactus"	Preserve the Google API JSON responses by storing them in a LinkedList<> and only modifying if User requests it (They shouldn't)	4	GK
21	Rick roll calendar import	Import Calendar only lists calendars from your Google Calendar	Import Calendar has an extra calendar at the end of the list.	Remove the renderRick() function and fake value in renderOptions in ImportPage.jsx	1	MP
22	Calendar view is a week off	Default calendar view displays the current week	Default calendar view displays one week in the future	Set defaultDate to the correct value in renderCalendar() in UserPage.jsx	2	MP
23	Stress Manager text in Navbar is scrambled	Stress Manager text in the Navbar is displayed correctly	Stress Manager text in the Navbar is scrambled	Remove scrambling code in render() in Navigation.jsx	1	MP
24	'Http' doesn't work. 'Https' only works	If you go to " <a href="http://stressmanager.herokuapp.com">http://stressmanager.herokuapp.com</a> ", and you log in normally	If you go to " <a href="http://stressmanager.herokuapp.com">http://stressmanager.herokuapp.com</a> ", and try to login, you get an error message	Add Redirect URL to Google Client Credentials	2	GK
25	You add the same calendar multiple times	If you add an existing calendar, then it is just not added to the DB	If you add an existing calendar, then it is added to the DB, and	Add a conditional statement that checks if the calID exists for that	3	GK

			displays as well	User
